the kahuzi biega national park in the democratic republic of the congo a protected area and unesco world heritage site that has received funding and material support from the german and us governments among other international supporters has long been celebrated as one of the most biodiverse places on the planet however park authorities there have engaged in a three year program of violent forced expulsions targeting the original human inhabitants of the park the indigenous batwa of kahuzi biega who are among the most marginalized groups in the country this report to purge the forest by force documents the highly organized grievous and widespread human rights abuses jointly carried out by park guards and congolese army soldiers against batwa between 2019 and 2021 in october 2018 after four decades of broken promises of resettlement reparations and justice from the congolese government and other stakeholders segments of batwa communities returned to the park rebuilding villages on their ancestral lands their return was met with swift and devastating violence by park authorities the report presents evidence of park guards and soldiers conducting three large scale operations between 2019 2021 targeting at least seven highly populated batwa inhabited villages inside the park along with numerous smaller scale evictions and acts of repression among other abuses dozens of batwa have been killed injured arbitrarily detained or subjected to violent group rape in what amounts to a systematic campaign of violence designed to terrorize batwa and drive them out of the park these large scale operations are illustrative flashpoints in the decades long process of marginalization and brutalization visited upon batwa in the name of conservation ongoing violence is rooted in the original expulsion from their ancestral homeland to pave the way for the creation of the park in the 1970s forcing an already marginalized indigenous community into decades of grinding impoverishment landlessness and displacement the story of the batwa of kahuzi biega is not an isolated incident instead it is emblematic of the widespread systemic violence inherent in the rigidly colonial conservation model widely used in east and central africa funded and facilitated by a network of international entities with

deadly consequences for indigenous peoples and local communities living in the vicinity of protected areas the tragic events detailed in this report have been made possible by a culture of impunity that devalues indigenous life in service of a highly militarized approach inherent in the fortress conservation model excluding the land's original inhabitants in violation of international law

conflicts in western societies have been on the rise and not just since the financial crisis of 2008 this is generally explained in economic terms with growing disparities in wealth and income the left should benefit from this with its redistribution philosophy however the right is on the upswing even though its neoliberalism is fueling social conflicts how is that behind the economic tensions lies a deep crisis of meaning the right is exploiting this by offering simplistic set pieces of meaning with success because people strive for nothing so much as meaning in their own lives the example of the usa shows how neoliberalism destroys people and societies possible solutions also come from there
