though often assumed by scholars to be a product of traditional and perhaps oral compositional practices comparable to those found in early greek epic archaic elegy has not until this
point been analyzed in similar detail with respect to such verse making techniques this volume is intended to redress some of this imbalance by exploring several issues related to the

production of greek elegiac poetry by investigating elegy's metrical partitioning and its localizing patterns of repeated phraseology traditional elegy makes clear that the oral formulaic processes lying at the heart of homeric epic bear close resemblance to those that also originally made archaic elegy possible however the volume's argument is then able to be pressed even further by looking at the most common metrical anomaly in early elegy epic correption in order to demonstrate that elegiac poets in the archaic period were not simply mimicking an earlier productive style but were actively engaging with such traditional techniques in order to produce and reproduce their own poems because correption exhibits several patterns of employment that depend upon the meshing and adapting of traditional phraseological units it becomes clear that in elegy just as it is in epic this metrical phenomenon is inextricably entwined with traditional techniques of verse composition and we therefore have strong evidence that elegiac poets of the archaic period were still making active use of these oral formulaic techniques even if actual oral composition itself cannot be proven for any individual author or poetic fragment the implications of such findings are quite large as they require a wholesale shift in our modern methods of inquiry into elegy for a wide range of concerns of meter phraseology and even the much broader issues of intended meaning and overall aesthetics

this book examines the fundamental principles whereby the tradition of indo european oral formulaic composition provides a context for the critical interpretation of certain kinds of english and german medieval poetry renoir s purpose is to apply the rapidly increasing amount of original and far reaching research in oral formulaic theory and tradition to the critical interpretation of poetry he concentrates on works of recognized literary merit such as beowulf and the hildebrandslied primarily because the book is aimed at english speakers and the examination of major poems drawn from early english and immediately related cultures is more relevant to this audience and because a preponderance of the masterpieces of oral formulaic composition that have survived are in the west germanic tradition in contrast to many oral formulaic investigations this study is primarily concerned with the literary quality of the materials examined it is addressed to all scholars concerned with medieval english poetry and its roots scholars concerned with germanic philology and oral formulaic matters and scholars concerned with literary interpretation in general further it has considerable potential for use by students and in the classrooms

the two great epic theme poems beowulf and judith paired in the beowulf manuscript preserved in the british museum are here presented in a translation with a unique fidelity that restores the true anglo saxon rhythmical line of five subtypes of four beat stress adhering scrupulously to the alliterative strictures of anglo saxon verse and exploiting its epithetical style this is a ground breaking piece of work in that it recreates the indispensable stylistic and esthetic effects of the original while attaining a natural modern idiom something that had been thought impossible to achieve the key insight in this book is the stated and demonstrated philosophy that alliteration and imagistic compound metaphors are a living breathing part of our linguistic heritage and practice in modern english today but rendering the poems requires an intricate sensibility to old english style in order to recreate the force that they had the old english text is included interlinearly with the translation to facilitate comparison and acquaintance with the original poems introductory essays discuss 1 the living tradition of alliteration and epithetical phrasing common to anglo saxon poetry and modern english idiom and 2 the literary tradition and merit of the two poems the book as a whole is a scholarly accomplishment which revivifies these two great works for the entire modern public
